Shorter
Involve security, ethics
AI – is already include (digi. technology)

Digitalization in higher education involves integrating digital technologies, tools, and practices into learning and teaching, academic and administrative functions. It leverages technology to enhance learning and teaching, streamline operations, and foster innovation. This includes considerations for cybersecurity, ethical data use, and privacy issues.

Keywords

Digital learning, digital tools, digital skills, engagement, learning analytics, digital resources <mark>data protection, ethics.</mark>

General remarks

Delete ==all== stakeholders and ==each== students

Clear instead transparent

Ownership - Other word autonomy, **responsibility** – student-centred approach

Glossary – digital comptences and digital learning

Harmonization of Hints style.

Overlaps

1.4 create <mark>courses which support</mark> the development of students' digital skills. Plural instead of singular (Development)

2.3 I support the development of students' digital skills in my course. (Action)

2.4. I am aware of data protection in <mark>my course(s)</mark> and I <mark>support students to effectively manage and protect (personal) data.</mark>

6.2. I apply the digital data protections of my institution and legislation rules.

Note: Flexibible usage of the tool.

Bigger changes

1.1 I craft digital learning experiences that align seamlessly with the philosophy ==student-centered== learning, the requirements of the discipline, and the overarching educational objectives.

I design digital learning that is consistent with conceptions of teaching, discipline and the institutional mission of education.

==Hint: My endeavours focus on ensuring that digital learning is harmoniously integrated with the student-centred approach, disciplinary standards, and the broader educational mission of the institution. For example, I tailor online modules to complement the specific pedagogical styles actively support student engagement, maintaining a inspirative educational environment.==

Bigger changes

TA 2.2 I prioritize keeping students up to date with the latest digital advancements relevant to the subject matter covered in my courses.

Move from the hint.

I ensure that students are familiar with new digital developments in my course(s)' area(s).
